BUREAU FOR MEDICAL SERVICES**

**Office of Pharmacy Service
Prior Authorization Criteria**

**KALYDECO®
(ivacaftor)
Prior Authorization Request Form
Effective 6/01/2018**

KALYDECO is a cystic fibrosis transmembrane conductance regulator (CFTR) potentiator indicated for the treatment of cystic fibrosis (CF) in patients age 2 years and older who have one mutation in the CFTR gene that is responsive to ivacaftor based on clinical and/or in vitro assay data.

Criteria for Approval

- 1) Individual must be two (2) years or older; **AND**
- 2) Patient must have a confirmed diagnosis of Cystic Fibrosis; **AND**
- 3) Patient must be determined have at least one mutation in the CFTR gene which is responsive to ivacaftor as confirmed by an FDA-approved CF mutation test; **AND**
- 4) Patient must have a documented baseline AST, ALT and FEV₁ (forced expiratory volume in one second) presented with the prior authorization request; **AND**
- 5) Patient must NOT be homozygous for the F508del mutation in the CFTR gene; **AND**
- 6) Dosage does not exceed 150 mg twice daily for ages 6 and up; **OR**
- 7) For patients ages 2 to less than 6 years, dosage should be weight-based and may not exceed 75 mg twice daily.
- 8) Patients under the age of 18 must have undergone a baseline ophthalmic examination to monitor for lens opacities/cataracts.

Prior authorizations will be for every 6 months in the first year, followed thereafter by an annual prior authorization.

Criteria for Continuation of Therapy

- 1) Patients under the age of 18 must have follow up ophthalmic examinations at least annually (documentation required); **AND**
- 2) Patient must have LFTs/bilirubin monitored every 6 months for the first year of treatment and annually thereafter (documentation required); **AND**
- 3) Serum ALT or AST < 5 times the upper limit of normal (ULN); **OR**
- 4) Serum ALT or AST < 3 times the ULN with bilirubin < 2 times the ULN.
